1,570

Number of gauging stations on the NRFA

59,000 yrs

Number of years of daily flow data on the NRFA

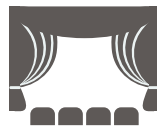

300,000 km

Length of all the UK's rivers would stretch around the equator over 7 times

354 km

Length of the UK's longest river is the Severn, the length of over 8 marathons

1 min

Amount of time the peak flow of the Eden would have taken to fill the Royal Albert Hall during Storm Desmond

1841

Queen Victoria was on the throne when the earliest gauging station on the NRFA was opened

1,000 x

Number of times the average flow of the Amazon is larger than that of the River Tay in Scotland

0.04%

Proportion of all the freshwater flowing into the world's oceans that comes from UK rivers

4 mins

Time it would take average outflows of GB to fill Wembley Stadium

3 x

Number of times Cornwall could fit into the River Thames catchment
